Instructions

^ COLLAPSE ^

1. Visit w3schools and go to the Java Tutorial section: https://my-learning.w3schools.com/tutorial/java
2. Complete the following readings
   1. Introduction Lessons 1.1 - 1.5
   2. Output Lessons 2.1 - 2.2
   3. Variables Lessons 3.1 - 3.4
   4. Data Types Lessons 4.1 - 4.7
   5. Operators and Math 6.1 - 6.2
   6. Conditionals Lessons 7.1 - 7.3
   7. Loops Lessons 8.1 - 8.4
   8. Arrays 9.1 - 9.3

Guide:

1. Make sure you're in the main branch locally (`git checkout main`) and `git pull origin main` any pending changes
2. Make a new branch per the recommended branch name below (`git checkout -b ...`)
3. Fill in the items in the worksheet below (save as often as necessary)
4. Once finished, export the worksheet
5. Add the output file to any location of your choice in your repository folder (i.e., a Module2 folder)
6. Check that git sees it via `git status`
7. If everything is good, continue to submit
   1. Track the file(s) via `git add (name_of_file)`
   2. Commit the changes via `git commit -m "some summary message"` (don't forget the commit message)

3. Push the changes to GitHub via `git push origin (the_branch_name)` (don't forget to refer to the proper branch)
4. Create a pull request from the homework related branch to main (i.e., main <- "homework branch")
5. Open and complete the merge of the pull request (it should turn purple)
6. Locally checkout main and pull the latest changes (to prepare for future work)
7. Take the same output file and upload it to Canvas

Task #1: Reflect on the following topics
Weight: ~100%
Points: ~2.00

∧ COLLAPSE ∧

Columns: 1

Sub-Task

100%

Group: Reflection
Task #1: Reflect on the following topics
Sub Task #1: What concepts/topics were totally new to you?

☰, Task Response Prompt

Mention specific concepts/topics

Response:

The concepts that were new was mainly type casting. I genuinely forgot that was thing and reviewing it now gave me that recap of how to cast from one type to another.

Sub-Task

Group: Reflection
Task #1: Reflect on the following topics
Sub Task #2: What concepts/topics were you already familiar with?

☰, Task Response Prompt

Mention specific concepts/topics

Response:

The concepts I'm already familiar with are conditionals, loops, data types, variables, operators, and math.

Sub-Task

100%

Group: Reflection
Task #1: Reflect on the following topics
Sub Task #3: What topics do you still not feel confident about? If confident, explain why.

≡, Task Response Prompt

At least a few reasonable sentences.

Response:

The concepts I'm still not confident about are arrays/objects and utilizing more for loops. Although I was able to put for-each loops in practice with the previous homework, it felt like I still needed more practice to really get the hang of it. With arrays and objects it becomes a bit more complicated where it's not the initializing/assigning part but being able to use those concepts for further use is what gets me. Being able to come about it later on is what gets me a bit confused.
